# CANVA SETTINGS TO CREATE A PRINT READY PDF.

① Under View Settings, make sure that the following are selected:
- Show rulers and guides
- Lock guides
- Show print bleed

② Make sure any artwork that touches the trim, extends beyond to fill the bleed area.

③ When exporting the file for print, use these settings.
- Download
- PDF Print
- Select Crop marks and bleeds

④ If these setting are used, your PDF should look like this. Your artwork will extend past the crop marks.
